

海洋特務 | 小尖兵

遇見大未來

各位評審委員及與會的同仁，大家好，我是來自印尼雅加達臺灣學校的PAK SANGGA

Jakarta Taipei School

最後，將由我的隊友ELAINE來告訴大家關於JTS學生為保護自然所做的努力。責任。

the BIG Questions

過度濫捕

海洋汙染

消失的紅樹林

淨灘行動

未來綠城市

01

Why

印尼漁業部長鐵腕炸毀非法濫捕漁船?

02

Why

越來越多美麗的珊瑚礁消失了?

03

Why

紅樹林被稱作海底森林?

04

Why

沙灘及海岸上怎有這麼多垃圾?

05

How

未來城市如何綠化我們的世界?

Transportations in the future

By Yi Chen and Matthew

In my opinion, the buildings will be very technological and higher than Burj Khalifa. I think that by 2055 we'll have our own private jets and submarine cars.

The private jets will have all terrain function, robot service and auto pilot. The all-terrain function means you can go anywhere with no conditions for example: lava, ice and other dangerous terrains, unlike nowadays, all-terrain vehicles can't go on extreme terrains. The robot service will provide you anything provided in the private jet.

Submarine cars will be one hundred percent see through. The submarine cars will also be a car that can go underwater so we can see a lot more sea creatures under the sea. It will be protected with the strongest metal that will maybe be found in 2050. And the submarine cars will also have auto pilot just in case the driver wants to see the sea creatures too. The submarine cars will also be able to go on the ground.]

So hopefully in the future there will be the shiny and convenient private jet and the super see through submarine cars. Now we just have to wait until 2050 and m

QUESTION 1	QUESTION 2
海洋污染的英文是什麼?	下列哪一項不是減少海洋垃圾的方法?
A Air pollution	A 減少使用塑膠袋
B Noise pollution	B 帶可重複使用的袋子
C Ocean pollution	C 將不要的廢物倒入河海
D Light pollution	D 回收資源
